In your ORAL HYGIENE this month

Turnover in Dental Practice

Even the dentist who is blessed with a full appointment book will find this article well worth reading, for a normally careful man, when too hard pressed for time, may unknowingly develop careless habits—the kind of habits which are responsible for much of “The Turnover in Dental Practice.”

As Doctor Harold Gluck points out, “You are dealing with a human mind that is the average mind. In order that the patient sees the procedure, it may become necessary to go through what looks like time-consuming rituals, such as the careful washing of hands, the overworking of the sterilizer, or even changing into a fresh coat.”

★ ★ ★

Do you make good use of “Your Super Secretary Without Salary”? Mary Hudgins explains how you may call upon your local librarians for information which might take you hours to dig out of books. These well-educated women are trained to sort, sift, and file data so that it is available almost instantly. Even the libraries of smaller communities possess surprisingly complete files on literally thousands of subjects. So, when you need information, why not pick up your phone and call your efficient—and co-operative—“super secretary”?

★ ★ ★

Are you seeing your patients as they are or as you are? Edith Calmenson warns dentists that, while it's perfectly natural to judge others by ourselves, it is not an accurate method of

appraisal. Your patient may not share your mental, emotional, or even financial viewpoint. “Striking a Balance in Patient Relations” is not the easiest thing in the world to do—but it is certainly well worth trying.

★ ★ ★

Doctor A. I. Chertock is, according to his article, about to come up with a world-shaking dental discovery—if his unusual research materials hold out. You will smile at the gentle satire of “The Hotel X . . . Discovery.”

★ ★ ★

Thousands of people will know Doctor John Marsh and his wife, Betty, as well as they know their favorite movie actors. In fact, the Marshes may well be favorite screen personalities for they're starring in “Cinerama Holiday,” the story of an American couple's trip to Europe. Marcella Hurley has written the interesting story of their exciting adventure.

★ ★ ★

“Get Your Child Patient's Chin Off His Chest,” advises Doctor Richard S. Youngs, and explains how you can do it. It's much easier to work on a child when you—and he—are comfortable.

★ ★ ★

Don't miss the regular departments and features which appear in Oral Hygiene every month. From the erudite quiz questions to the frivolous “Laffodontia,” dentists will find information and relaxation packed into these special pages.

Medicine and the Biologic Sciences

January

Subdural Hematomas; Skin Damage by Sunlight; Disc Operation—Indications; Brucellosis—General Considerations; Antibiotics vs. Fungus Infection; Pelvic Congestion of Psychosomatic Origin 28

February
